

We want to establish industries in Berea; we will bring electricity here; we will improve the schools here so that your children can attend schools near their parents. The health services will be improved. For details of what we propose to do, I would advise you to buy our manifesto.

We have achieved some measure of development. The world is eager to help us. The United Nations, the World Bank, the World Food Programme, the Catholic Relief Services, Sweden, the United States, Britain, South Africa, Nationalist China, Korea, West Germany, Denmark, Zambia and many other bodies and countries want to assist us in our development. It is this Government that established good and friendly relations with these bodies and governments. All we are asking you to do is to show your approval of these friendly relations with other free world countries by voting for the Basotho National Party candidates.

There is a point which I must not forget to mention. The Basotho want development. To this extent our administration must throw away some of the colonial-minded features. Our administration will be polished in such a way that it will engender a sense of nationhood among our people, whatever their political, religious and other loyalties. The whole nation, the Government and the Civil Servants will all be involved in national development.

In conclusion, allow me to give you a warning: Beware of the jackals! They will come to you with all sorts of pretences.
