

I wish to conclude by pointing out to you people of Thabana-Li-Mele that this Government has paved the way for you. Follow this road and lead other people to the ultimate end, that is, self-reliance. We have laid the foundation upon which you built the walls and my appeal to you is that you elect us into power again at the 1970 elections so that we may finish the work that we have already started. It is improbable that if you elect the Opposition members they would wish to protect and continue the valuable works that we have started, because they are not only indifferent but opposed to all works which they themselves have not started.
